Our Strategies and Programs

What is the purpose of the Coalition?

You said:

Space to share information and pathway for networking

...to provide strategy and collaborative information to solve issues affecting youth in Papua New Guinea.

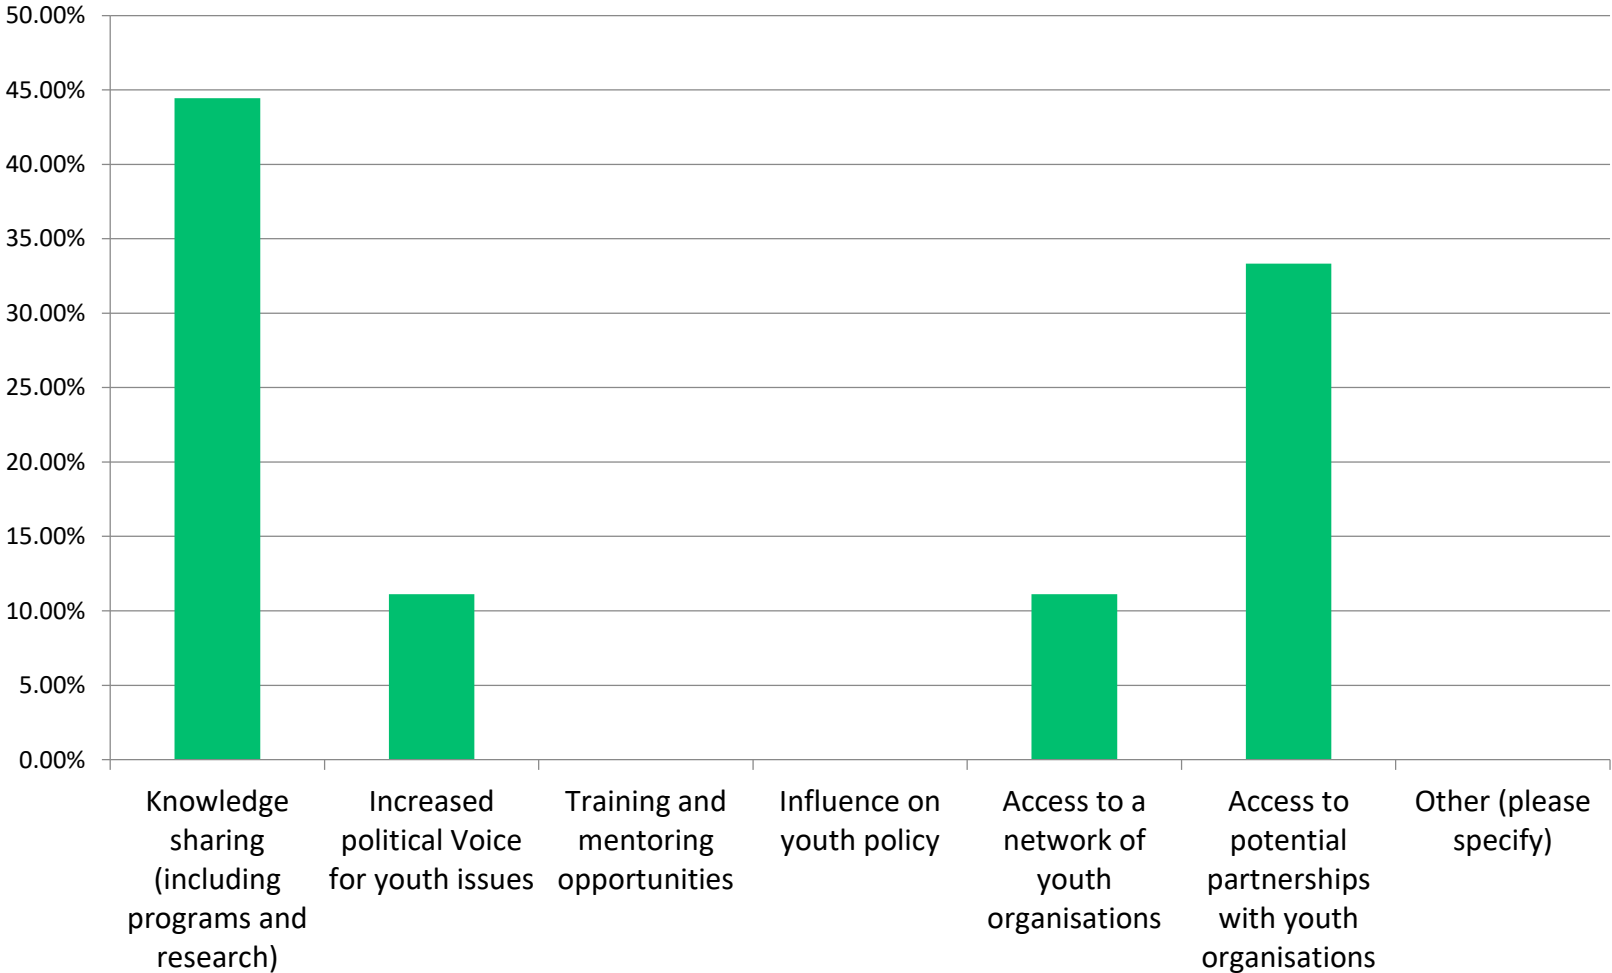

Invest in interest of youths , churches, associations, sports, community and push for policy process, a voice for political will

Establish Key Focus Areas for youth focused programs; Be a resource centre for youth focused programs (i.e. What funding opportunities are available...)

...get a cross cutting view on issues affecting youth in varying sectors and be able to link up different organizations/government departments/NGOs/Civil Society etc that address such issues

What would your organisation most like to gain from a Youth Coalition?

Shared Purpose

Tackling Youth Issues in PNG by creating:

- A forum to share information, networks, energy and opportunities (a resource hub for the sector)
- A space to develop strategic ideas and partnerships to solve issues
- A platform to amplify youth voice, including into political spaces

“...get a cross cutting view on issues affecting youth in varying sectors and be able to link up different organizations/government departments/NGOs/Civil Society etc that address such issues”

Proposed Activity Areas

Partnership Development – a space to form partnerships to respond to complex issues and funding opportunities

Program and Knowledge Sharing- to enhance our combined capacity (sharing our training) and better understand pathway options (our programs) for our young people

Influence- amplifying youth voice, delivering a single powerful voice on youth issues to government, political parties or other stakeholders eg. private sector, regional youth bodies

Marketing and Communication – to create a shared platform to promote and cross promote (to each other) members activities, programs and successes

Understanding change- sharing and combining our data and stories of change to get a stronger understanding of the youth sector in PNG. Supporting the information needs of each other and external parties.
